

Dispensing towers to portion and control drinks supplied in kegs and bag-in-boxes such as beer, soft drinks, fruit juices, wines and spirits

Features

- modular concept for 5 different sizes : 3,5,7,9 and 11 key panels
- outputs for 18 to 54 electro valves
- most single or multiple standard valves can be used thanks to programmable pulse driven mode
- possibility to connect external towers, limited only by the number of available outputs of the module
- inputs for 18 to 54 flow meters or FOB detectors
- up to 11 panels, 12 keys each
- shift key to increase the number of portions
- portions sizes and cocktails programmable
- display of credits and dispense information for each key
- 4 information leds per panel to display operational errors (empty keg, line blocked, flow meter error, etc.)
- EasyReader included
- second EasyReader optional
- MicroTerminal can be built-in instead of a key panel

Features of Cascade 3 module technology

- large number of cocktails, long drinks and mixed products
- galvanically isolated high speed network
- easy to install, user friendly operation, high quality ergonomic design
- safe mode in the event of network failure
- all Cascade 3 modules (COF, TER, FCM, DIS, Econo, Compact) are galvanically insulated, connected in the same network and controlled by a MasterTerminal
- programmable with **Cascade 3 Builder** software (Windows compatible) or from the MasterTerminal keyboard
- connection with all POS via Hart96, specific or generic protocol
- approved Cascade 3 power supplies :
230 V / 30VDC / 200 VA – 80 VA – 30 VA

Dispensing tower dimensions
H 490 x D 390
W 330 – 500 – 670 – 840 - 1010

Dimensions of external unit
H 65 x D 153 x W 430
